DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 6-8, filed July 8, 2005, with respect to the rejection(s) of claim(s) 1-3 and 5 under 35 U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of U.S. Patent No. 5,886,999 to Kojima et al.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,886,999 to Kojima et al.

Regarding claim 1, Kojima teaches a single time slot based data burst (e.g., see col. 4, line 38 – col. 12, line 41), comprising: a plurality of time slot based data frames (e.g., SWV/VDT, SWA/ADT, and SWM/MDT, see FIG. 4); less than all but more than one (e.g., audio and other media remain, but video signal SWV/VDT is stopped, see col. 10, lines 31-39; see also col. 6, line 39 – col. 7, line 27 regarding one or more synchronous words are not detected) of the plurality of time slot based data frames including a sync word (e.g., SWV/VDT comprising sync word SWV, SWA/ADT comprising sync word SWA, and SWM/MDT

Art Unit: 2665

comprising sync word SWM); wherein at least two adjacent ones of the plurality of time slot based data frames do not include a sync word (e.g., see col. 6, line 39 – col. 7, line 27 regarding an instance where a plurality of predetermined number of synchronous words are not detected in a predetermined period).

Regarding claim 2, Kojima teaches the time slot based data frames are TDMA frames (e.g., see col. 1, lines 53-67 regarding TDMA).

Regarding claim 3, Kojima teaches the sync word is included at the beginning of the less than all of the plurality of time slot based data frames (e.g., see FIG. 4 wherein sync words are included prior to the data).

Regarding claim 5, Kojima teaches the at least two adjacent ones of the plurality of time slot based data frames include data payload in a position containing the sync word in the less than all of the plurality of time slot based data frames (e.g., see FIG. 4 regarding data in each of the data frames within DT).

Allowable Subject Matter

4. Claims 6-16 are allowed.

5. The following is an examiner's statement of reasons for allowance: claims 6-16 were allowed in the previous office action (mailed April 13, 2005) by Examiner Kenneth N Vanderpuye, and these claims are herein allowed for the same reasons as previously determined.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 2665

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Nos. 5,566,210 to Saito et al.; 5,960,046 to Morris et al.; and 6,111,927 to Sokoler each disclose TDMA systems utilizing various sync word configurations.
